

Coronavirus (COVID-19) Screening Resources

Franklin County Rural Health Clinic recognizes that many people have concerns and questions about symptoms and risk of contracting [COVID-19](#). The majority of people have minor symptoms and do not require medical care or testing. Individuals with minor symptoms are advised to stay home rather than seek testing or medical care.

This information has been developed to help you understand when to seek medical care.

If you have:

- Cough
and/or
- Fever of 100 degrees or higher
or
- Traveled to China, South Korea, Italy, Iran, or anywhere abroad, or are concerned that you have been exposed through other contact
and
- Do NOT have difficulty breathing

You should:

Stay home with support in isolation. Rest, stay hydrated, use ibuprofen or acetaminophen as needed for fever. **If you have questions, call the Franklin County Rural Health Clinic for a free phone screening.** Performing a screening over the phone will allow medical review while limiting exposure to others.

If you have:

- Cough
and/or
- Fever of 100 degrees or higher
or
- Traveled to China, South Korea, Italy, Iran, or anywhere abroad, or are concerned that you have been exposed through other contact
and
- Do NOT have difficulty breathing but have flu-like symptoms such as muscle aches, chronic diseases such as diabetes, heart failure, COPD, asthma, are immunocompromised or have concerns to discuss with a nurse

You should:

Call your Franklin County Rural Health Clinic for a free phone screening. Performing a screening over the phone will allow medical review while limiting exposure to others. If it's determined that you need to be seen in person, you will receive instructions on the facility at which to be seen.

If you have:

- Cough
and/or
- Fever of 100 degrees or higher
or
- Traveled to China, South Korea, Italy, Iran, or anywhere abroad, or are concerned that you have been exposed through other contact
and
- Do have difficulty breathing

You should:

Seek care at an emergency department.

Thank you.
